**Abstract:** We admit that we are not perfect beings (theology) but we must not neglect the importance of other beings (science) for a mutual interdependence (biology). We are higher beings. It greatly depends on us for the strengthening of humanity, civilization and ecology. We must identify the key signs of moral pollution. How can we minimize if not eradicate them. The highest level of awareness is self-actualization postulated by Abraham Maslow. Spiritual maturity is higher than intellectual awareness by Ismael Fortunado 2019. The aspects of man work hand in hand in the wellness of a person by analysis of Peter Holy. There are determinants of a poor society by Ismael Fortunado and we have needs of man by Ismael Fortunado. We have to integrate these two theories. The author use thought experiment.

**Keywords:** Care Collaboration God Love Morality Pollution.

## INTRODUCTION

There should be love [4]. There should be peace [1]. Teaching is important [2]. There should be hope [3]. Pollution is mosthow bad [5]. Morality should not be ignored [6]. There should be equality [7]. There should be faith [8]. A definition of moral pollution is concerned with greed, hypocrisy, disruption and corruption [9].

## METHODOLOGY

Thought Experiment and Combination and Inverse *Resultation*.

**Aspects of man Figure 1**

1 Spiritual	2 Intellectual	3 Emotional	4 Social	5 Environmental	6 Occupational	7 Physical
-------------	----------------	-------------	----------	-----------------	----------------	------------

**Determinants of a Poor Society Figure 2 [10, 11]**

1 High Morbidity Rate	2 High Mortality Rate	3 Low Education Rate	4 Dissatisfaction to products and/or services	5 Unemployment	6 Unjustified crime rate
7. Low quality transportation and its facilities	8. Poor Workplace and Habitation	9. Pollutions and Unsustainability of Natural resources	10. Bad Debts	11. Increasing inflation rate	12. Poor weather systems and technology

**Example:**

So for Aspects 1 and Determinants 1, it may be disregard for God.  
 So for Aspects 1 and Determinants 2, it may be disregard for laws.  
 So for Aspects 1 and Determinants 3, it may be lack of interest and concentration.  
 So for Aspect 1 and Determinants 1 and 2, it may be disregard for the greatest Messiah, Jesus Christ.

## RESULTS

1. Man must be pure.
2. This is an evaluation on man on how can he be pure.

## DISCUSSION

1. This serves a first table.
2. The formula is  $7 \times 12$  so it will be 84 potentials.
3. It can be  $12 \times 7 + \text{etc.}$  so more or less 84 plus.
4. As man matures, he should consider not to be hypocrite ignoring the other parts of the proposition.

## RECOMMENDATIONS

1. Only morally upright deserves this.
2. Please include resultation as a term. This knows the result or possible result/s of two or more things or ideas when combined.

## CONCLUSION

Generations change so is morality. Pollutions are still there. We have to care to love to minimize, eradicate and avoid moral pollution. We must be clear of sins. This paper tells about them.
